PROJECTS

• Production-Ready DevOps Pipeline for a Full-Stack Application	Feb , 2026
Deployed a full-stack app on AWS using Terraform, Docker, and GitLab CI/CD; secured with NGINX/HTTPS and monitored with Prometheus & Grafana.	
• Multi-Tier AWS Infrastructure with Terraform	Mar , 2026
Designed and deployed a secure and scalable AWS infrastructure using Terraform, including a custom VPC with public and private subnets, Internet Gateway, and NAT Gateway. Implemented IAM roles, security groups, and secure access via AWS Systems Manager (SSM) without SSH, ensuring strong network isolation and security. Link	
• Hospital Cash Flow Management Application	Jan, 2026
A centralized financial system for hospital cash flow and reporting, built with a DevOps-first approach (automation, repeatable deployments, and observability-minded delivery). Link	
• Complete Hospital Management System (Nomargueri)	Dec, 2025
Full-stack hospital management platform with GitLab CI/CD pipelines, dockerized services, automated server configuration with Ansible, and deployment on Ubuntu (Contabo).	
• Cloud Project: AWS S3 Bucket Solution (CHR Libikisi)	Mar, 2026
An AWS S3 storage solution designed for secure storage and management of hospital financial reports, with cloud fundamentals and IAM-first access control mindset.
